# Pilot Carbon Farming Program

The County of San Diego Planning & Development Services is developing a Pilot Carbon Farming Program to help avoid and reduce greenhouse gas emissions through carbon farming efforts in the unincorporated county.

## What is Carbon Farming?

According to Carbon Cycle Institute, "Carbon farming is a whole farm approach to optimizing carbon capture on working landscapes by implementing practices that are known to improve the rate at which **carbon dioxide is removed from the atmosphere** and stored in plant material and/or soil organic matter."

## Program Goals

- To avoid and/or sequester GHG emissions
- To support local producers
- To promote climate-smart agriculture

Please reach out to share your ideas,

[Ariel.Hamburger@sdcounty.ca.gov](mailto:Ariel.Hamburger@sdcounty.ca.gov) or [Claire.Moss@sdcounty.ca.gov](mailto:Claire.Moss@sdcounty.ca.gov)

We want to hear from producers on how to build this program!
