

San Diego County Motor Vehicle Crashes: 2000 – 2009

Data Tables

The tables that follow are modeled after the Annual Report of Fatal and Injury Motor Vehicle Traffic Collisions, published by the California Highway Patrol (CHP). The CHP report also uses data from the Statewide Integrated Traffic Records System (SWITRS), for crashes occurring anywhere in the state of California. The tables are numbered to match the numbering system of the CHP report.

Cells highlighted in red indicate the highest values for that table. Cells highlighted in blue indicate the lowest values for the table.

In tables where the CHP report listed data by county within California, the tables in this section show data by San Diego County subregional area.

The CHP report can be found online at:
